

# STREAMFLO® 25

## DI Or Delivery Only Portable Pure Water Trolley System

The Streamflo® 25ltr Portable Trolley System is the go-to choice for professional window cleaners and contract cleaners. Featuring a 25ltr container with a powerful 100psi diaphragm pump that guarantees a steady and efficient flow. The compact design, collapsible handles, and lightweight frame with front-mounted handle provide easy storage and handling even in confined spaces. Equipped with a rechargeable Li-ion battery, intelligent charger, and a 5-hour charge time for a 12-hour run-time, it offers efficient operation, lasting up to 2-3 days depending on usage.

**V16**

Control water flow speeds directly for tougher dirt

### Features

The inclusion of a Streamline™ flow controller maximises flow, saving water effectively. For added convenience, the trolley features low-profile flat-free tyres for rough terrain, and a stainless outlet connector with a stop valve to conserve water when disconnected. With optional DI filtration for fast pure water production, a filter cartridge system for quick and easy changes, and a TDS hand-held meter for accurate water quality checks (DI version only), this portable trolley system delivers both specifications and benefits in one comprehensive solution.

Compact design, with collapsible handles for storing in confined areas.

### System Features

- Powerful 100psi diaphragm pump.
- Streamline™ flow controller to maximise flow and save wasting water.
- Compact design, with collapsible handles for storing in confined spaces.
- Lightweight frame with handle mounted on the front plate, for easy lifting and handling.
- Low profile flat-free tyres, for rough terrain.
